ROOF, DECK, AND BALCONY DRAINS

ASME A112.6.4-2003

Date of Issuance: November 21, 2003

The next edition of this Standard is scheduled for publication in 2008. There will be no addenda or written interpretations of the requirements of this Standard issued to this edition.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

FOREWORD

The American National Standards Committee A112 was established on July 27, 1955 to standardize plumbing materials and equipment. Its first organizational meeting was held on July 22, 1958. Panel No. 21 was created on May 1, 1964, to establish standards for roof drains, floor drains, backwater valves, and other drainage specialties. Its scope was the recommendation of suitable existing standards in cooperation with interested sponsors, or the development of adequate new standards as needed for roof drains, floor drains, and other drains as used or installed in plumbing systems. The committee has since been reorganized as an ASME Standards Committee.

The ASME A112 Committee was restructured during 1998 in accordance with the ASME Redesign Process and Panel 21 Working Group 1 became Project Team 6.4. The project team met twice to update this Standard and incorporated criteria from the International Association of Plumbing and Mechanical Officials' Product Standards PS 41 and PS 47.

This Standard was preceded by ANSI A112.21.2M-1983, which was withdrawn in 1995.

Suggestions for the improvement of this Standard are welcome. They should be sent to the American Society of Mechanical Engineers, Three Park Avenue, New York, NY 10016-0509.

This Standard was approved as an American National Standard on August 14, 2003.

ASME A112 STANDARDS COMMITTEE

Standardization of Plumbing Materials and Equipment

(The following is the roster of the Committee at the time of approval of this Standard.)

OFFICERS

P. J. Higgins, *Chair*
S. A. Remedios, *Vice Chair*
C. J. Gomez, *Secretary*

COMMITTEE PERSONNEL

R. H. Ackroyd , Consultant	D. E. Holloway , SGS US Testing Co.
J. A. Ballanco , JB Engineering and Code Consulting	M. Klimboff , Consultant
S. L. Cavanaugh , United Association	M. T. Kobel , IAPMO
A. Cohen , A. Cohen and Associates	L. M. Kriegbaum , <i>Alternate</i> , Underwriters Laboratories, Inc.
N. Covino , <i>Alternate</i> , American Standard, Inc.	J. W. Lauer , Sloan Valve Co.
P. V. DeMarco , American Standard, Inc.	R. M. Martin , California Energy Commission
G. S. Duren , Code Compliance, Inc.	P. Meikle , Underwriters Laboratories, Inc.
R. Emmerson , Chicago Faucets Co.	L. E. Mercer , Moen, Inc.
F. C. Evans , Zin-Plas Corp.	S. Rawalpindiwala , Kohler Co.
L. S. Galowin , National Institute of Standards and Technology	S. A. Remedios , Delta Faucet Co.
C. J. Gomez , The American Society of Mechanical Engineers	J. A. Sargent , <i>Alternate</i> , Kohler Co.
R. I. Greenwald , Sunroc Corp.	G. L. Simmons , Charlotte Pipe and Foundry
G. Gress , BOCA International	W. M. Smith , Jay R. Smith Manufacturing Co.
J. P. Gronewold , NSF International	D. W. Viola , Plumbing Manufacturers Institute
P. J. Higgins , PJ Higgins and Associates, Inc.	R. E. White , Richard E. White and Associates
	W. C. Whitehead , Plumbing and Drainage Institute

A112 PROJECT TEAM 6.4 — ROOF DRAINS

S. J. McDanal , <i>Project Team Leader</i> , Jay R. Smith Manufacturing Co.	P. J. Higgins , PJ Higgins and Associates, Inc.
R. H. Ackroyd , <i>Deputy Project Team Leader</i> , Consultant	M. T. Kobel , IAPMO
A. R. Becker , Zurn Industries, Inc.	P. Szczotka , LSP Products Group Co.
G. J. Flegel , Flegel Consulting Services	D. W. Viola , Plumbing Manufacturers Institute
R. L. George , SmithGroup, Inc., Architects, Engineers	R. E. White , Richard E. White and Associates
C. R. Graham , Martech Enterprises	W. C. Whitehead , Plumbing and Drainage Institute

CORRESPONDENCE WITH THE A112 COMMITTEE

General. ASME Standards are developed and maintained with the intent to represent the consensus of concerned interests. As such, users of this Standard may interact with the Committee by requesting interpretations, proposing revisions, and attending Committee meetings. Correspondence should be addressed to:

Secretary, A112 Standards Committee
The American Society of Mechanical Engineers
Three Park Avenue
New York, NY 10016-5990

Proposing Revisions. Revisions are made periodically to the Standard to incorporate changes that appear necessary or desirable, as demonstrated by the experience gained from the application of the Standard. Approved revisions will be published periodically.

The Committee welcomes proposals for revisions to this Standard. Such proposals should be as specific as possible, citing the edition, the paragraph number(s), the proposed wording, and a detailed description of the reasons for the proposal, including any pertinent documentation. When appropriate, proposals should be submitted using the A112 Project Initiation Request Form.

Interpretations. Upon request, the A112 Committee will render an interpretation of any requirement of the Standard. Interpretations can only be rendered in response to a written request sent to the Secretary of the A112 Standards Committee.

The request for interpretation should be clear and unambiguous. It is further recommended that the inquirer submit his/her request in the following format:

Subject:	Cite the applicable paragraph number(s) and the topic of the inquiry.
Edition:	Cite the applicable edition of the Standard for which the interpretation is being requested.
Question:	Phrase the question as a request for an interpretation of a specific requirement suitable for general understanding and use, not as a request for an approval of a proprietary design or situation. The inquirer may also include any plans or drawings that are necessary to explain the question; however, they should not contain proprietary names or information.

Requests that are not in this format will be rewritten in this format by the Committee prior to being answered, which may inadvertently change the intent of the original request.

ASME procedures provide for reconsideration of any interpretation when or if additional information that might affect an interpretation is available. Further, persons aggrieved by an interpretation may appeal to the cognizant ASME Committee or Subcommittee. ASME does not “approve,” “certify,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

Attending Committee Meetings. The A112 Standards Committee schedules meetings as needed, which are open to the public. Persons wishing to attend any meeting should contact the Secretary of the A112 Standards Committee. The A112 home page contains information on future meeting dates and locations.

ROOF, DECK, AND BALCONY DRAINS

1 GENERAL

1.1 Scope

This Standard establishes minimum design requirements for roof drains, including general purpose, gutter and cornice, parapet and promenade, balcony, or deck types, which convey rainwater from the roof area of building structures. It includes definitions, nomenclature, outlet types and connections, dome or grate-free area, top loading classifications, materials and finishes, and accessories.

1.2 Units of Measurement

Values are stated in U.S. Customary units and the International System of Units (SI). The U.S. Customary units shall be considered as the standard.

1.3 Illustrations

The illustrations (figures) included in this Standard are intended only to describe and portray typical roof drain types and are not intended to restrict design or to be used for specification purposes.

1.4 Reference Standards

The following documents form a part of this Standard to the extent specified herein. The latest issue shall apply.

- ASTM A 48, Grey Iron Castings
- ASTM A 74, Cast Iron Soil Pipe and Fittings
- ASTM A 307, Carbon Steel Externally Threaded Fasteners
- ASTM A 525, Specification for General Requirements for Steel Sheet, Zinc-Coated (Galvanized) by the Hot-Dip Process
- ASTM A 527, Specification for Steel Sheet, Zinc-Coated (Galvanized) by the Hot-Dip Process, Lock-Forming Quality
- ASTM A 536, Ductile Iron Castings
- ASTM A 563, Carbon and Alloy Steel Threaded Nuts
- ASTM A 888, Hubless Cast Iron Sanitary Drainage Systems
- ASTM B 16, Free Cutting Brass Rod, Bar and Shapes for Use in Screw Machines
- ASTM B 152, Specification for Copper Sheet, Strip, Plate and Rolled Bar
- ASTM B 370, Specification for Copper Sheet and Strip for Building Construction
- ASTM C 564, Rubber Gaskets for Cast Iron Soil Pipe and Fittings

ASTM C 584, Copper Alloy Sand Castings for General Applications

ASTM C 1440, Thermoplastic Elastomeric (TPE) Gasket Materials for Drain, Waste, and Vent (DWV), Sewer, Sanitary and Storm Plumbing Systems

ASTM D 1248, Polyethylene Plastics Molding and Extrusion Materials

ASTM D 1784, Rigid Poly (Vinyl Chloride) (PVC) Compounds and Chlorinated Poly (Vinyl Chloride) (CPVC) Compounds

ASTM D 2661, Acrylonitrile-Butadiene-Styrene (ABS) Schedule 40 Plastic Drain, Waste and Vent Pipe and Fittings

ASTM D 2665, Poly (Vinyl Chloride) (PVC) Plastic Drain, Waste and Vent Pipe and Fittings

ASTM D 3965, Rigid Acrylonitrile-Butadiene-Styrene (ABS) Compounds for Pipe and Fittings

ASTM D 4066, Nylon Injection and Extrusion Materials

ASTM D 4101, Propylene Plastic Injection and Extrusion Materials

ASTM D 4329, Practice for Operating Light- and Water-Exposure (Fluorescent UV-Condensation Type) for Exposure of Plastic

ASTM F 628, Acrylonitrile-Butadiene-Styrene (ABS) Schedule 40 Plastic Drain, Waste and Vent Pipe with a Cellular Core

ASTM G 23, Practice for Operating Light- and Water-Exposure Apparatus (Carbon-Arc Type) for Exposure of Non-Metallic Materials

Publisher: American Society for Testing and Materials (ASTM), 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959

ASME B1.20.1, Pipe Threads, General Purpose (Inch)

Publisher: The American Society of Mechanical Engineers (ASME International), Three Park Avenue, New York, NY 10016-5990; Order Department: 22 Law Drive, Box 2300, Fairfield, NJ 07007-2300

CSA B602, Mechanical Couplings for Drain, Waste, and Vent Pipe and Sewer Pipe

Publisher: The Canadian Standards Association (CSA), 5060 Spectrum Way, Mississauga, ON L4W 5N6, Canada

1.5 Definitions

1.5.1 General

blow hole: a hole in casting due to air or gas in the metal or mold.
